How to use the Experts Directory
The directory is designed to help journalists find an expert who may be prepared to add useful commentary to a story. The front half of the directory is an alphabetical listing of University departments giving the names of academic experts in those departments, a description of their individual areas of expertise, their telephone numbers (including home numbers where available) and, also where available, email addresses. The second half of the book (after the first divider) contains 3 indexes. The first is a simple alphabetical index of all the experts listed in the directory. The second is a list of researchers who have indicated they are able to give a broadcast quality interview in a language other than English. The third and final index (found after second divider) is an extensive subject based index. This edition of the directory was published in December 2016.

Electronic Experts Directory
Visit the online directory, which is regularly updated and contains additional information.
See: http://experts.warwick.ac.uk

Facilities for broadcasters
The University has a fixed camera and ISDN line on campus. The ISDN line (+44 (0) 24 7647 1287) is for broadcast quality radio interviews. Further details on how to book that line are available from the Press and Policy Office. The camera (PA Globelynx TV Ready Network) is suitable for broadcast quality television interviews. Further details on how to book the camera are available from the Press and Policy Office.

Note on Contents of Directory
While the directory is principally designed for use by journalists other users may also find it useful, but you should bear in mind that the descriptions of research or expertise are geared towards a media rather than academic or commercial audience. The directory is not an exhaustive list of University staff or departments. Inclusion has been voluntary and it is not therefore a definitive list of all research in the University.

Research at Warwick
The University of Warwick has established a formidable reputation for excellence in research. In the Government's last research selectivity exercise the University was ranked among the top ten UK universities.
